

Model 3115

L a b e l A p p l i c a t o r

The Label-Aire® Model 3115 combines a standard high-speed application of up to 1500" (2000" optional) of pressure-sensitive label web per minute with exceptional placement accuracy of $\pm 0.03"$. It is the ideal applicator for web-fed business form presses and high-speed production lines requiring large labels.

This versatile model accepts a wide variety of label sizes up to 7.13" wide and 18.0" long. Using the wipe-on method of application, the label is automatically peeled from its liner, and then gently and securely affixed at the same rate of speed as the product. The Model 3115's flexibility allows products to be labeled in any orientation: top, side, or bottom.

The near-perfect accuracy of the Model 3115 can be attributed to its stepper motor technology, which is directed by a menu-driven microprocessor that also permits repeatable settings and constant monitoring.

When mounted on Weber's castered T-base stand, the Model 3115 is transferable from one production line to another. Its rugged, corrosion-resistant stainless steel and anodized aluminum casing provides durability even in harsh environments.

For simultaneous label print-and-apply application, the Model 3115 can be combined with a Weber thermal/thermal-transfer printer. Weber also offers a wide variety of standard and custom-designed labels to meet virtually any labeling requirement.

KEY FEATURES

- Applies p-s labels at rates up to 1500" of label web per minute
- Wipe-on application of labels up to 7" W x 18" L
- Stepper motor technology ensures consistent placement accuracy
- Combine with label printer for print-and-apply capability

Weber®

Model 3115

L a b e l A p p l i c a t o r

Dimensions

33.5"L x 22.9"W x 30.5"H
(85cm x 58.2cm x 77.5cm)

Weight

145 lbs (65.7kg)

Electrical

115 VAC, 60 cycle, 5 amps; over load protection built-in (220 VAC, 50 cycle optional)

Electronics

Menu-driven microprocessor controlled

Air Requirements

2 cfm at 60 psi to 90 psi (only when optional imprinter is used)

Product Sensing

Photoelectric

Label Roll Size

12.0" O.D. (305mm) wound on 3.0"(76mm) I.D. core; [16"(406mm) with power driven unwind optional]

Label Styling Requirements

Die-cut, waste removed, with minimum of 0.125"(3mm) separation between labels in running direction

Label Placement Accuracy

Label placement to $\pm 0.03"$ (0.8mm) when labels are produced to specifications and product handling is controlled

Standard Label Sizes*

7.13" wide (181mm); length dependent on application

Labeling Speed

1500 linear inches (38.1 meters) of web per minute standard; up to 2000 inches (50.8 meters) and 3000 inches (76.2 meters) per minute available

Options

Right- or left-handed unit, low label alarm, web break alarm, imprinters, and powered unwind
